SeaSAFER CONFERENCE

The SeaSAFER project in association with its partnership consortium will hold a project conference supported by the European Commission titled “**Simulation of Sea Accidents For Effective Responses**” introducing SeaSAFER project outputs. The conference will be held at *Lithuanian Maritime Academy, I. Kanto g. 7, 92123 Klaipėda, Lithuania* on the March 2023.

The conference targets academics, maritime professionals, international organisations and policy makers who are interested in working towards improving communication standards at sea.

The conference will be hosted by Lithuanian Maritime Academy in collaboration with the SeaSAFER partnership. The partnership involved in the SeaSAFER project (www.seasafer.com) developed a learning program considering different ranks of seafarers, taking into account the experience they need in **Sea Accidents** based on the real activities specific to each type of vessel.

The aim of the conference is to inform local, national and international maritime authorities, organisations and professional bodies about the SeaSAFER approach, and to interact with MET policymakers, suppliers and end-users to gain feedback for the outputs of the project.

We invite you to attend the conference as a relevant member of the target audience. There will be SeaSAFER Partners attending the reception and introducing their project contribution.

Topics being touched in the presentations will cover:

- SeaSAFER platform
- Practices in Sea Accident in EU countries
- Demonstrating the need for tools for Sea Accident
- Enabling further mobility of seafarers across Europe and Worldwide
- In this event the partners of “the SeaSAFER Project” will be present: Lithuanian Maritime Academy (LT), MARITIME INNOVATORS (TR), Mircea cel Batran Naval Academy (RO), Nikola Yonkov Vaptsarov Naval Academy (BG), ESCOLA SUPERIOR NAUTICA INFANTE D.HENRIQUE (PT), IDEC (GR)
